popularity - A measure of the track's popularity, typically based on factors like number of streams, downloads, and listener engagement.

Duration_ms - The duration of the track in milliseconds.

Explicit - Indicates whether the track contains explicit content (1 for explicit, 0 for not explicit).

Af_danceability - A metric representing how suitable a track is for dancing, based on elements like tempo, rhythm stability, beat strength, and overall regularity.

Af_energy - A measure of the intensity and activity of a track.

Af_key - The key the track is in.

Af_loudness - The overall loudness of the track in decibels (dB).

Af_mode - Indicates whether the track is in a major (1) or minor (0) key.

Af_speechiness - Detects the presence of spoken words in the track (e.g., rap or spoken poetry).

Af_acousticness - A measure of the acoustic characteristics of the track, where 0 represents high confidence that the track is not acoustic and 1 represents high confidence that it is.

Af_instrumentalness - Predicts whether a track contains no vocals, where 1 indicates high confidence that the track is instrumental.

Af_liveness - Detects the presence of an audience in the recording.

Af_valence - Describes the musical positiveness of the track, where high values represent positive valence (e.g., happy, cheerful) and low values represent negative valence (e.g., sad, depressed).

Af_tempo - The tempo of the track in beats per minute (BPM).

Af_time_signature - The time signature of the track, indicating the number of beats in each bar and the type of note that receives one beat.
